

# MobiCom 2019: Call for Demos and Posters

The MobiCom demo and poster sessions solicit the submission of research, platform, and product demonstrations and posters from both academia and industry.

Demonstrations should showcase innovative research or product prototypes, platforms, and applications in the areas of mobile computing and wireless and mobile networking. We strongly encourage live demos based on novel applications in the domain of mobile computing and wireless systems. We also welcome live demos reproducing evaluation results of papers appearing in ACM Mobicom 2019 or past editions as well as other relevant venues.

The MobiCom 2019 Poster Session will provide an excellent opportunity for initial feedback on your early research results and give your ongoing projects early visibility. ACM MobiCom 2019 will host an ACM [Student Research Competition \(SRC\)](#) alongside the Posters Program. SRC offers graduate and undergraduate students an opportunity to present their original research, and get feedback. The presenters are strongly encouraged to include their poster submission for the SRC.

The MobiCom 2019 Demo and Poster committee will review all submissions to select the accepted demos and posters. All accepted submissions will be considered for Best Demo and Best Poster Awards. A committee will decide the winner on-site after evaluating all presentations.

Please refer to the main conference introduction and [CFP](#) for the general areas that are relevant to the typical MobiCom audience.

## **Why should you submit a Demo or Poster?**

Presenting a demo or poster is a great opportunity, especially for students and industry, to obtain valuable feedback on ongoing research from the knowledgeable crowd at the conference. Accepted submissions will be posted on the conference website and published as a three-page abstract for the archived conference proceedings and the ACM digital library.

## **Where and What to Submit?**

Please submit a proposal of your demo or poster at <https://mobicom19demos-posters.hotcrp.com/>. It should be a summary or extended abstract describing the research to be presented, maximum 3 pages in US letter size (8.5 x 11 inches)

with font no smaller than 10 point size, in PDF file format. Please ensure that the proposal includes:

The names, affiliations, and email addresses of the authors, and whether the submission should preferably be considered for the demo session, or the poster session. If presenting a demo, mention the equipment to be used for the demo (check default setup below), the space and setup time required, and any additional facilities needed including estimated power connections needed for the demo, special environments and tools, Internet access, physical space requirements, etc.

**Can I also include a poster when presenting the demo?**

Yes. All accepted demo submissions would also be provided with a single easel for displaying the accompanied poster.

**Default Setup:**

For all accepted submissions in demo or poster sessions, a single easel for displaying a poster will be provided. Suggested poster size is 3 x 3 ft, or 3 x 4 ft in portrait orientation. By no means should the poster exceed 4x6 ft in portrait orientation.

For submissions accepted for demos, additionally a single 6 x 2.5 ft table would be provided. Demo participants should bring extension power cable/multi-point along with suitable power adapters and voltage transformers.

**SRC instructions:**

Indicate whether you would like the poster submission to be considered for the Student Research Competition (SRC). Indicate your correct identifier by adding **[SRC/Undergraduate]** or **[SRC/Graduate]** in the submission title for consideration in respective SRC category. Note that if any of the authors is a graduate student, then the submission will be considered under the graduate category.

**Important Dates:**

Submission deadline: June 1, 2019 at 11:59pm

Notification of Acceptance: June 24, 2019 at 11:59pm

Camera-ready: July 1, 2019

**For further questions, please contact the chairs:**

**Important Notes:**

**AUTHORS TAKE NOTE:** The official publication date is the date the proceedings are made available in the ACM Digital Library. This date may be up to two weeks prior to the first day of your conference. The official publication date affects the deadline for any patent filings related to

published work. (For those rare conferences whose proceedings are published in the ACM Digital Library after the conference is over, the official publication date remains the first day of the conference.)
